

## HOW TO INSTALL **ADJUSTMENT LAYER** FROM LUTSLOUNGE.COM

1. Once you download the file from LUTsLounge.com, double-click on the download the unzip the file to reveal the **Adjustment Layer - LUTs Lounge** Folder.
2. Open a Finder window and click on the main user folder (represented by a house icon).
3. Double-click the Movies folder and find the Motion Templates folder.
4. The Adjustment Layer is a Title effect so you will need to open the Titles folder.
5. Copy the Adjustment Layer you downloaded to the Titles folder. This will add the effect to Final Cut Pro. If you already have Final Cut Pro X open, close and restart for the changes to take affect.
6. Navigate to the Titles and Generators section of Final Cut Pro, locate the Titles category and you will see an Adjustment Layer Title added. Now you can use the Adjustment Layer by simply dragging it on your timeline.
